

JAIFIX TG STD

Cost Effective Cementitious Waterproof Tile Grout

Description :

JAIFIX TG STD is a ready to use cementitious tile grout for the permanent grouting of ceramic tiles in both damp and totally submerged conditions.

Uses :

- Mainly used for swimming pool tile grouting.
- For filling of tile joints in kitchens and bathrooms.
- Recommended for all porous and absorbent wall and floor tiles.
- Can be used for Tile joints width of 3 mm to 13 mm.
- It can be used on material such as ceramic wall tiles, clinkers and mosaics

Advantages :

- Non-shrinking
- Chemical resistant
- Water resistant
- No wet curing required
- Non yellowing.
- Hard wearing.
- Cost effective.

Application :

- As a general rule on a porous surface, allow 24 hours for tiles to set prior to grouting.
- Ensure the gaps between the tiles are clean, dry and free of adhesive.

MIXING :

- Mix complete bag of powder into the potable water with a partial slow speed.
- Drill until lump free paste is obtained. The ratio of 1 : 3 against powder and water by weight to be followed.

APPLICATION :

- Apply JAIFIX TG STD to the spaces between tiles with proper rubber float or sponge, ensuring the joints and edges are completely filled and compacted.
- Remove surplus plaster with damp cloth.
- When the grout is dry, polish tiles with clean, dry, soft cloth.
