

K CURE WX WHITE

White Pigmented Wax Based Concrete Curing Compound

Description :

KCURE WX WHITE is a solvent free, membrane forming wax based white pigmented concrete compound, suitable for spray application to freshly poured concrete. The resultant film retains sufficient moisture in the concrete. Conforming to ASTM C- 309, TYPE 1, Class A

Uses :

As a more effective and economical alternative to Hessian and water and polythene curing regimes. Suitable for use on all concrete surfaces.

Advantages :

- Eliminates the need for water.
- Imparts a harder dust free surface.
- Single component
- High curing efficiency.
- Reduced labour costs.
- Water based.
- Reduces drying shrinkage.

Application Instructions :

KCURE WX WHITE should be applied 5 to 6m² / 1 litre of surface area. A single spray-applied coat is sufficient. Ensure that all spraying equipments is cleaned thoroughly with white spirit immediately after use. For horizontal surfaces spray on KCURE WX WHITE as soon as any excess water has dried off. This is usually within 30 minutes of finishing. Vertical surfaces should be wetted with water after stripping the KCURE WX WHITE should not be applied to dry or semi-dry concrete. After application of the KCURE WX WHITE membrane, the surface should be left undisturbed for at least 5 hours. Standard precautions should be taken during cold weather to protect the concrete from frost damage.

Packing & Coverage :

KCURE WX WHITE is supplied in 1 ltr, 5 ltr., 50 ltr., 100 ltr., and 200 ltr. Coverage 5 to 6 m² per litre.

Shelf Life :

12 months storage life when stored in original unopened container at between 5 °C to 45 °C in a dry and shaded place.

Health & Safety :

KCURE WX WHITE is non-hazardous. It should not be swallowed or allowed to come into contact with skin or eyes. Suitable protective goggles and gloves should be worn. In the case of contact with eyes, rinse immediately with plenty of water and seek medical advice. If swallowed, seek medical attention immediately, do not induce vomiting.

Note :
